The regulations give prominence to audible and light units because they allow to:

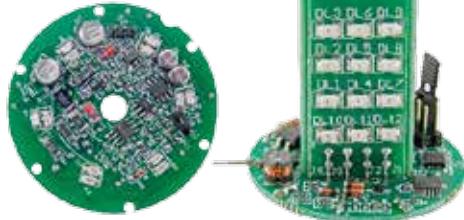

- increase workers, goods and environment safety
- make easier surveillance, control and maintenance of devices and process
- make faster the recognizable of process

The process and personnel tasks that have to be fulfilled involve the choice of particular signals.

■ LIGHT SIGNALLING

The use of colored signalling units is one of the most efficient means of communication.

Steady light unit with LED are commonly used to inform.

Intermittent light units with LED or strobe are commonly used to draw the attention and communicate alerts.

Every color has a specific meaning (read the chart below) and must be easily recognized.

COLOR	COLOR CODES		
	MEANING		
	Environmental and personnel safety	Process condition	Device condition
	Danger	Emergency	Breakdown
	Warning/Attention	Abnormal	Abnormal
	Safety	Normal	Normal
	Obligation/ Action required		
	Has no a specific meaning		

The regulations specify that stack lights used for machinery must follow a right sequence from top to the bottom: red, yellow, blue, green and white.

■ AUDIBLE SIGNALLING

The message originate from an audible signalling is used when:

- optical codes have restrictions
- draw the personnel attention is required
- is necessary to have more info due to a critical situation
- info needs immediate effect
- info to codify are shorts and easy

Decibel

Bel (B) used to be the official measurement unit of sound and was replaced by Decibel (dB) that is one/tenth of Bel. Decibel is a logarithmic measurement unit and depends by environmental states as frequency, speed, rain, foggy, moisture etc...

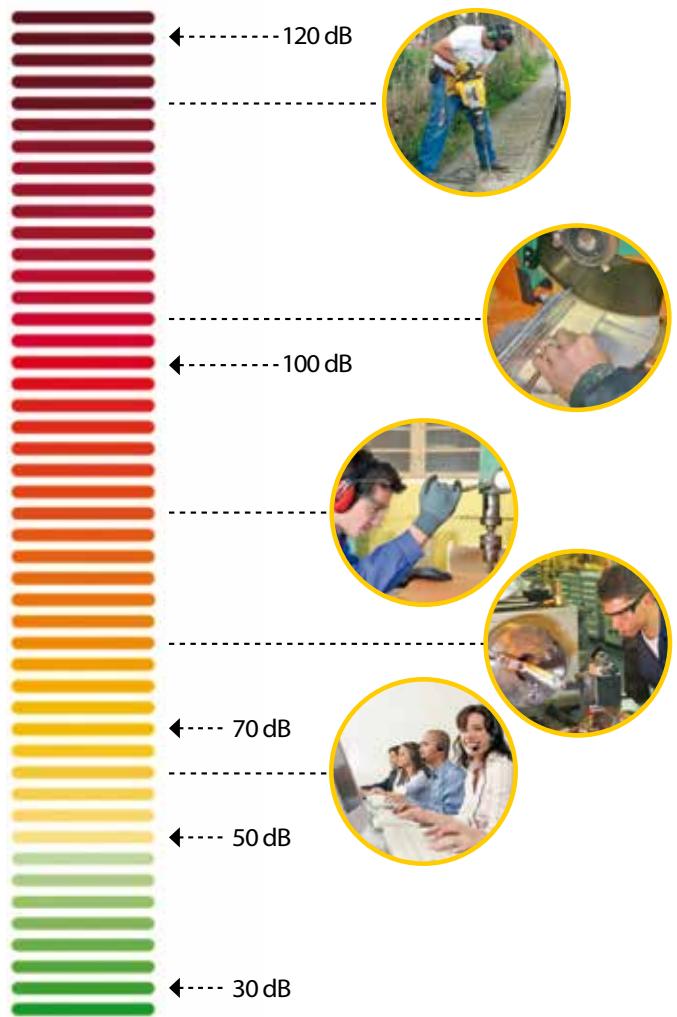

Audible signalling must be heard and easily understood from personnel and people around the area expected.

Recognizable

The audible signalling must be heard clearly and be distinguished from other noises or sounds around and have a specific meaning (EN7731).

Acoustic

Audible signalling must be heard clearly at distance. The acoustic pressure level A of the audible unit must be higher than acoustic pressure level of noises at least of 15dB.

How to calculate effective distance:

If sound spread in every direction, the level decrease by 6dB every twice the distance from source (take a look to the theorical chart on the right).

Distance (mt)	Fade out (dB A)
1	- 0
2 (double of 1 meter)	- 6
4 (double of 2 meter)	- 12
8	- 18
16	- 24
32	- 30
64	- 36
128	- 42
256	- 48
512	- 54

■ MTTFd

MTTF is the abbreviation of mean time to dangerous failure. It's a parameter used to identify reliability of one product as average life before a dangerous malfunction happens. MTTF is a statistic value, measured in years, recorded with tests and experiences and not give a guarantee of life or operating device. Many of our products have been tested. Contact us for further info.

MULTICOLOR

S 370

Ø 70mm

This signal lamp match technology with appearance and meet the most complex requests from industry.

- One lamp, 6 simultaneous messages.
- When 2 or more alarms are present the color lights up alternatively according to the event occurred.
- Three kinds of lights: steady, flashing and rotating.
- Can be available in combination of another light unit (370 series).

TECHNICAL FEATURES

Compliance

Directive 2006/95/EC Low Voltage
Directive 2004/108/EC Electromagnetic Compatibility
Directive 2011/65/EC RoHS
Directive 2006/42/EC Machinery

Conformity to standards

EN 60947-5.1 - EN 60073 - EN 60529 - EN 60068-2-6 -
EN 60204-1 - EN ISO 7731 - EN 981 - IEC 536

Material

Polycarbonate (PC)

Operating Voltage

24V DC (+/-10%)

Current

90 mA

Protection degree

IP 64 (if correctly assembled with cap and gasket), with audible IP 54

Protection against electric shock

Class II, safety insulation according to IEC 536

Resistance to vibrations

2 g min.(10 - 150 Hz)

Operating Temperature

- 20° C + 50° C

Number of combinable units

Max 2, except the QUADRICOLOR unit; Max 3, except the TRICOLOR unit

Connections

With screw cable clamp (maximum cable size 1,5mm²), placed inside the terminal unit

Sound

Pulse and continuous

Sound frequency

2900/3700 Hz

Effective dB, determined at a distance of 1 meter from sound module

90 dB

TYPE	ORDER CODES	NOTATION
QUADRICOLOR lamp, green, blue, amber and red. Steady or flashing light.	Type 04Q1B	Terminal unit, gray.
QUADRICOLOR lamp, green, blue, amber and red. Steady or flashing light.	Type 94Q1B	Terminal unit, black.
QUADRICOLOR lamp, green, blue, amber and red. Steady or flashing light.	Type 04Q7B	With integrated audible unit, terminal unit, gray.
QUADRICOLOR lamp, green, blue, amber and red. Steady or flashing light.	Type 94Q7B	With integrated audible unit, terminal unit, black.
TRICOLOR lamp, green, amber and red. Steady light.	Type 04T1B 532	Above tricolor is possible to add other units, terminal unit is gray.
TRICOLOR lamp, blue, amber and red. Steady light.	Type 04T1B 632	Above tricolor is possible to add other units, terminal unit is gray.
TRICOLOR lamp, green, amber and red. Steady light.	Type 94T1B 532	Above tricolor is possible to add other units, terminal unit is black.
TRICOLOR lamp, blue, amber and red. Steady light.	Type 94T1B 632	Above tricolor is possible to add other units, terminal unit is black.
TRICOLOR lamp, green, amber and red. Steady light.	Type 04T5B 532	Under tricolor is possible to add other units, terminal unit is gray.
TRICOLOR lamp, blue, amber and red. Steady light.	Type 04T5B 632	Under tricolor is possible to add other units, terminal unit is gray.
TRICOLOR lamp, green, amber and red. Steady light.	Type 94T5B 532	Under tricolor is possible to add other units, terminal unit is black.
TRICOLOR lamp, blue, amber and red. Steady light.	Type 94T5B 632	Under tricolor is possible to add other units, terminal unit is black.
TRICOLOR lamp, green, amber and red. Steady, flashing and rotating light.	Type MZ4T5B 532	Under tricolor is possible to add other units, terminal unit is gray.
TRICOLOR lamp, blue, amber and red. Steady, flashing and rotating light.	Type MZ4T5B 632	Under tricolor is possible to add other units, terminal unit is gray.
TRICOLOR lamp, green, amber and red. Steady, flashing and rotating light.	Type MN4T5B 532	Under tricolor is possible to add other units, terminal unit is black.
TRICOLOR lamp, blue, amber and red. Steady, flashing and rotating light.	Type MN4T5B 632	Under tricolor is possible to add other units, terminal unit is black.
TRICOLOR lamp, green, amber and red. Steady light.	Type 04T7B 532	With integrated audible unit terminal unit gray.
TRICOLOR lamp, blue, amber and red. Steady light.	Type 04T7B 632	With integrated audible unit terminal unit gray.
TRICOLOR lamp, green, amber and red. Steady light.	Type 94T7B 532	With integrated audible unit terminal unit black.
TRICOLOR lamp, blue, amber and red. Steady light.	Type 94T7B 632	With integrated audible unit terminal unit black.
TRICOLOR lamp, green, amber and red. Steady, flashing and rotating light.	Type MZ4T7B 532	With integrated audible unit terminal unit gray.
TRICOLOR lamp, blue, amber and red. Steady, flashing and rotating light.	Type MZ4T7B 632	With integrated audible unit terminal unit gray.
TRICOLOR lamp, green, amber and red. Steady, flashing and rotating light.	Type MN4T7B 532	With integrated audible unit terminal unit black.
TRICOLOR lamp, blue, amber and red. Steady, flashing and rotating light.	Type MN4T7B 632	With integrated audible unit terminal unit black.

COMBINED MULTICOLOR LIGHT AND AUDIO INTEGRATED TYPE 94T7B

TIPO 94T5B

The only one multicolor lamp that allow you to integrate information with audible or light unit.

TIPO 04T5B

MULTICOLOR Ø30mm

S 300

- The future of simple light panel indicators
- Small size, great brightness
- Perfect for small machinery
- Different color combinations
- Easy to install, connect and flexible

TECHNICAL FEATURES

Compliances

Directive 2006/95/EC Low Voltage
 Directive 2004/108/EC Electromagnetic Compatibility
 Directive 2011/65/EC RoHS
 Directive 2006/42/EC Machinery

Conformity to standards

EN 60947-5.1 - EN 60073 - EN 60529 - EN 60068-2-6 - EN 60204-1 -
 EN ISO 7731 - EN 981 - IEC 536

Material

Policarbonate (PC)

Operating Voltage

24V DC (+/- 10%)

Current

20 mA

Protection degree

IP 54 (if correctly mounted) according to EN 60529

Protection against electric shock

Class II, safety insulation (IEC 536)

Resistance to vibrations

2 g min.(10 - 150 Hz) according to EN 60068-2-6 AND 27

Operating Temperature

- 20° C + 50° C

Connections

with screw cable clamp (maximum cable size 1,5 mm²) seated at the bottom

Screw clamps with binding post gauge max. 1,5 mm²

MODULAR STACK LIGHTS

S 370

NO LIMIT STACK LIGHTS

Click Clack

An easy and functional accessory.

Simplify stack light un-mounting, saving time and delivery costs. Re-mounting is faster and flawless.

ANTI-TAMPERING MEASURE

With this important solution, nobody will be able to take lamp apart without tools, solving the responsibility problems in case of accident.

CUSTOM COLORS

Special colors for every customer request show how your satisfaction is important for us.

MULTIFUNCTIONAL LAMP

1 lamp, 3 different kinds of lights.
Steady, flashing and rotating.
Light lamp personalization
on request.

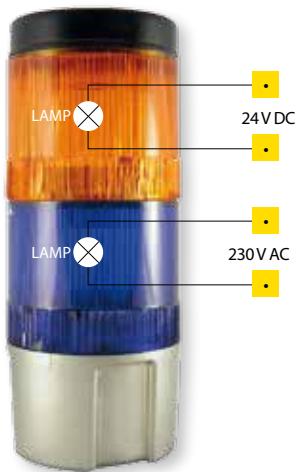

ULTRA BRIGHT LED LIGHT LAMPS

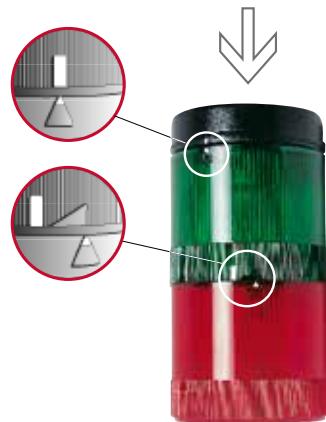

Brighter than traditional lamps,
ultra-bright LED guarantee
a great light even in direct
sunlight.
Saving energy and vibration
resistance are some of our LED
characteristic.

AN INCREDIBLE LIGHT LAMP.

An incredible light lamp.
1 lamp, 1 terminal unit but 3 different kinds of power supplies.
Every unit can be supplied in a different way without problems.

MODULAR STACK LIGHT

ASSEMBLED AND WIRED

Lamps can be furnished assembled or pre-wired, 2 kinds of wiring, cable length 500 mm with 5 wires output or cable length 300 mm with connector M125 indicators output.

A gentle pressure and a simple rotating movement allow you to mount or unmount the lamp.

A bayonet insert enables to join till 7 units together electrically and mechanically.

TECHNICAL FEATURES

Compliance

Directive 2006/95/EC Low Voltage
 Directive 2004/108/EC Electromagnetic Compatibility
 Directive 2011/65/EC RoHS
 Directive 2006/42/EC Machinery

Conformity to standards

EN 60204.1 - EN 60947.5.1 - EN 60073 - EN 60529
 EN 60068.2.6 - EN 60068-2-27 - EN ISO 7731 - EN 981 - IEC 536

Homologations

Material

Visual and audio module, cable unit, cap and base: polycarbonate.
 Tube: anodised aluminium or polycarbonate (PC).

Operating Voltage

250 V max.

Protection degree

IP 64 (if correctly assembled with cap and gasket), according to EN60529.

Protection against electric shock

Class II, double safety insulation with polycarbonate poles, class I with metal poles according to IEC 536.

Operating Temperature

- 20° C + 50° C (12V 40°C).

Resistance to vibrations

2 g min.(10 - 150 Hz) according to EN 60068.2.6.

Lens color

Amber - blue - yellow - neutral - green according to EN 60073.

Bulb

Bayonet connection type: BA 15d - 5W max.

With flash circuits: Xenon bulbs.

Number of combinable units

For all indicators: each cable unit can be combined with up to seven modular units (except for the single beacon type, which can be combined with maximum two units).

Connections

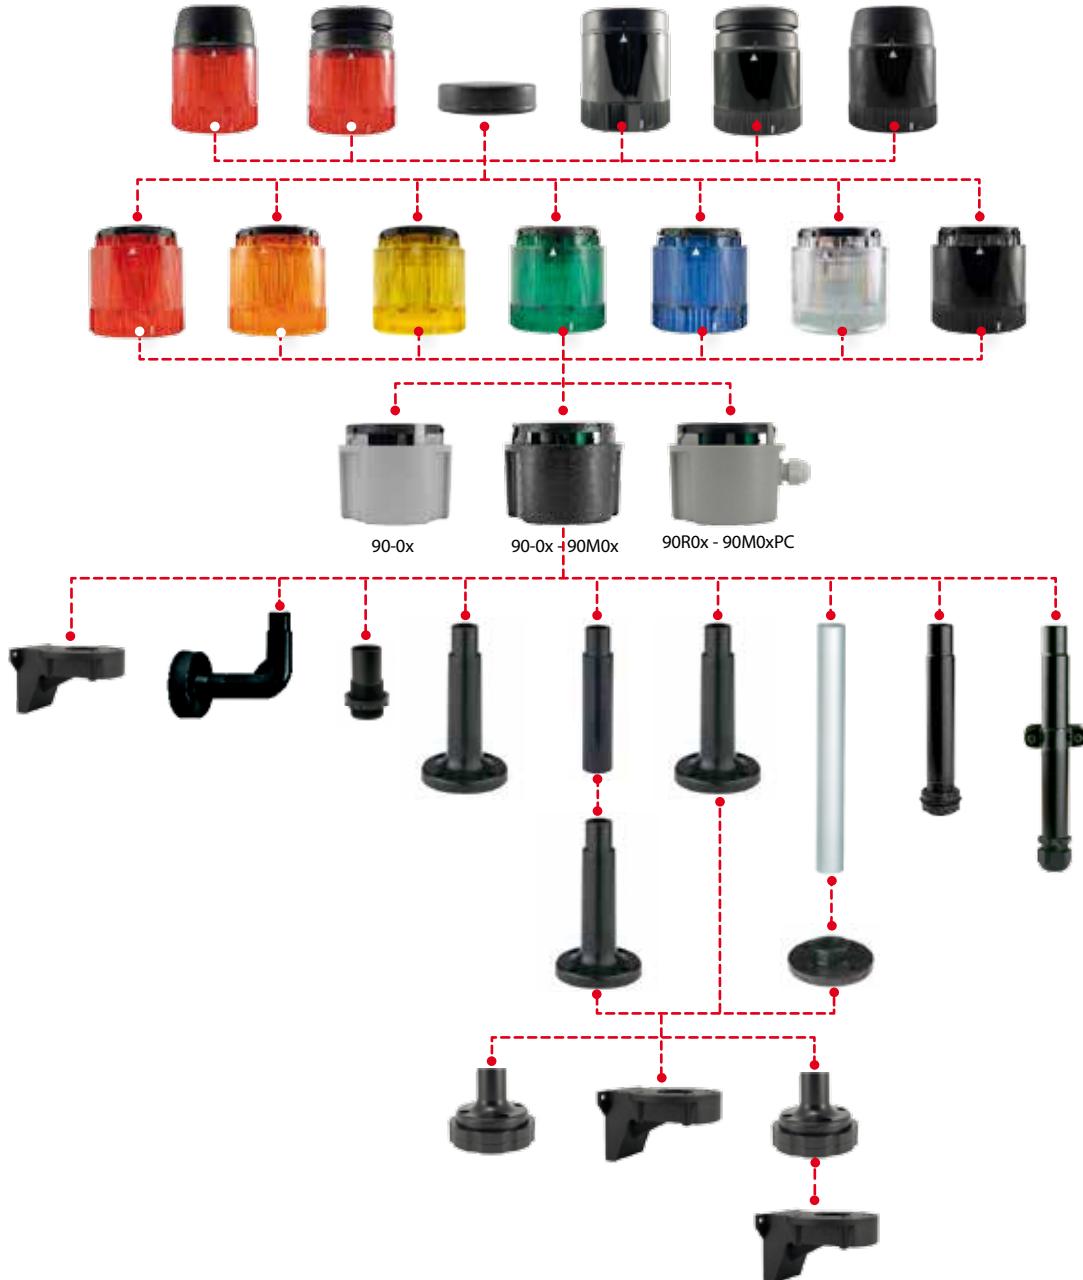

With screw cable clamp(maximum cable size 1,5 mm²).

Connection Id. Code

C - common to all signal units.

Numbers from 1 to 7 refer to each single module from the base to the top.

MODULAR CONFIGURATION

TERMINAL UNIT WITH CAP

Connections by means of clamps or prewired.

Clamps

Screw clamps with binding post.

Maximum gauge

1,5 mm²

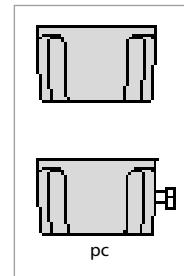

Connection id. code

C - common to all units.

Numbers from 1 to 7 refer to the colors, from the base to the top.

STEADY OR FLASHING LED LIGHT UNITS

Light output
 6 ultra bright LED integrated
 Lasting
 more than 50000 working hours
 Operating modes
 Steady or flashing light (to change the function shift the jumper inside)
 Operating Voltage
 24 V DC/AC
 Current consumption
 30 mA (the same for all illumination modes)
 Flash frequency
 1.4 Hz approx. (84 flashes per min.) according to EN 60073

STEADY UNIT AND INTEGRATED PULSE SOUND

Combined beacon (steady) and sounder with pulse or continuous audio signal.
The sounder can be fixed only as last sector.

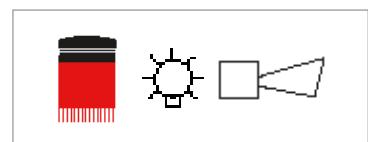

Operating Voltage
24 V DC (ac)

Current consumption
with 5 W filament bulbs, continuous sound
24 V, 230 mA
with LED bulbs, continuous sound
24 V, 75 mA

Light output
LED or filament bulb

Bulb type
with bayonet connection BA 15d

Sound frequency
600 - 3000 Hz

Type 127NB

Type 127EB

Bulbs not included

FLASHING UNIT AND INTEGRATED PULSE SOUND

Combined beacon (flashing) and sounder with pulse or continuous audio signal.
The sounder can be fixed only as last sector.

Operating Voltage
24 V AC/DC - 115 V - 240 V AC

Current consumption
with 5 W filament bulbs:
24 V DC - 230 mA / 24 V AC - 250 mA / 115 V AC - 35 mA / 240 V AC - 55 mA
with LED bulbs:

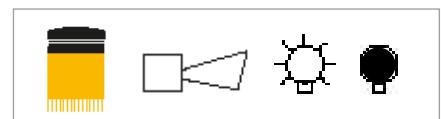

24 V, < 50 mA - 115 V, < 18 mA - 240 V, < 17 mA

Light output
LED or filament bulb

Bulb type
bayonet connection BA 15d

Flash frequency
1.4 Hz approx. (84 flashes per min.) according to EN 60073

Sound frequency
600 - 3000 Hz

COMBINED MULTIFUNCTIONAL LIGHT LED AND AUDIBLE UNIT

Combined beacon (multifunction) and sounder with pulse or continuous audio signal.
The sounder can be fixed only as last sector.

Operating Voltage
24 V DC (ac)

Current consumption
24 V DC, 75/130 mA

Light output
36 ultra bright LED integrated

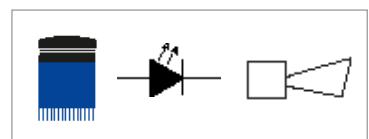

Lasting
more than 50.000 working hours

Operating modes
Steady light, flashing or rotating light (to change the function shift the jumper inside)

Flash frequency
1.4 Hz approx. (84 flashes per min.) according to EN 60073

Rotation frequency
1 revolution per second approx.

Sound frequency

AUDIO SIGNAL DEVICE TYPE 77 IP64

Already equipped with a cap, the audible unit can only be fitted to the top of tower light.

Sound

pulse or continuous (to change it, just remove or insert the relevant jumper in the printed circuit)

Sound frequency

2600 Hz according to EN 457

Signal repetition rate

1 Hz according to EN 457

effective dB ,determined at a distance of 1 meter from sound module

Type 77-24: pulse signal 84.5 dB - Continuous signal 82.6 dB

Type 77-15: pulse signal 78 dB - Continuous signal 75 dB

Type 77-30: pulse signal 78 dB - Continuous signal 75 dB

Operating Voltage

Type 77-24: 24 V DC/AC

Type 77-15: 115 V AC

Type 77-30: 240 V AC

Current consumption

Type 77-24: DC/AC, 200mA

Type 77-15: AC, 40mA

Type 77-30: AC, 30mA

Protection degree

IP64

S 370

MODULAR STACK LIGHTS Ø 70mm

ANTI-TAMPERING LOCK

- A screw block the wilful un-mount of light lamp
- Un-mount is possible only with tools
- This kind of stack light is sold assembled

TYPE	DESCRIPTION
-0Q	Add this following partial code to the product when ordering

Anti-tampering screw.

EXCLUSIVE COLORS

To fulfill the huge customer request (available for small quantities, 24 pcs orders)

A wide range of colors are available

Only cap, terminal unit, base and poles are painted

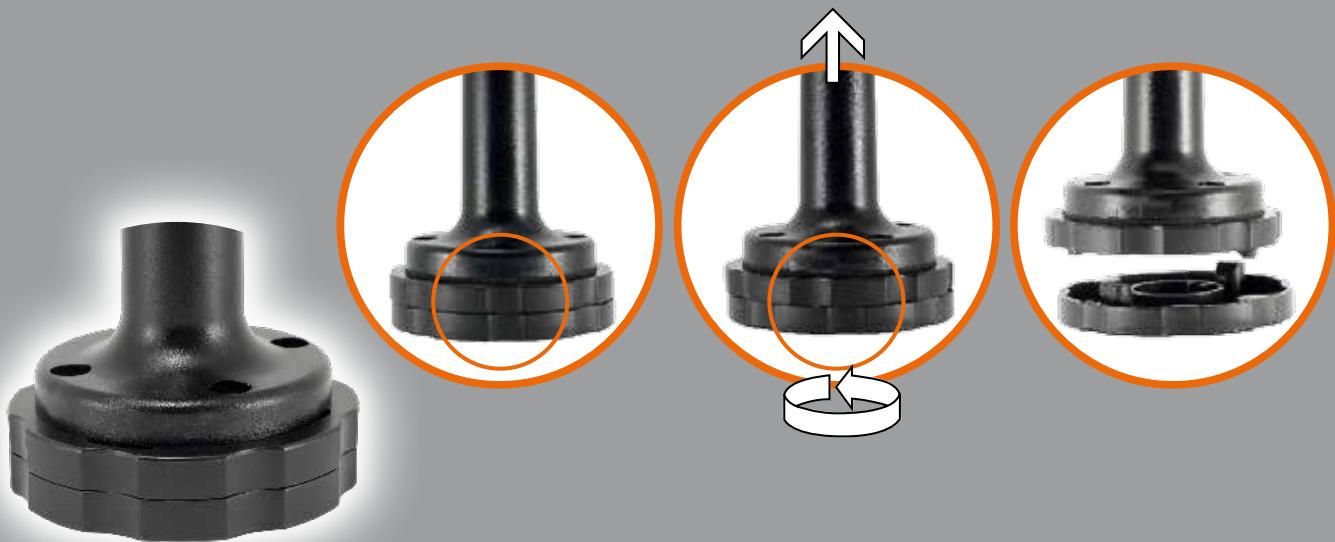

TYPE	DESCRIPTION
90-0x/1018	Exclusive color
54-0x/1018	Add RAL color you need (ex. 1018) to the product, when ordering

Click Clack

STACK LIGHTS AND ACCESSORIES

- An easy rotation allow a quick installation without tool
- Quick stack light un-mount after assembly
- Reduce machinery obstruction (important for shipment)
- Lesser packaging and cheaper delivery costs
- Flawless and quick installation matched with connector version

TYPE	DESCRIPTION
80-KK	Add this following partial code to the product when ordering

S 470

ASSEMBLED STACK LIGHTS Ø 70mm

- Stack light compact and assembled
- The right solution for warehouse management and facilitate orders
- Available pre-assembled with wires or connector M12, a great advantage for workers
- Ultra-bright LED for longlife and energy saving
- Available in different colors

TECHNICAL FEATURES

Compliance

Directive 2006/95/EC Low Voltage

Directive 2004/108/EC Electromagnetic Compatibility

Directive 2011/65/EC RoHS

Directive 2006/42/EC Machinery

Conformity to standards

EN 60947-5.1 - EN 60073 - EN 60529 - EN 60068-2.6 and 27 -

EN 60204-1 - EN ISO 7731 - EN 981 - IEC 536

Material

polycarbonate (PC)

Operating Voltage

24V DC (+/-10%)

Current

40 mA per unit

Protection degree

IP 64 (if correctly assembled with cap and gasket), with
audible IP 54

Protection against electric shock

Class II, safety insulation (IEC536)

Resistance to vibrations

2 g min. (10 - 150 Hz)

Operating Temperature

-20°C + 50°C

Lens color

orange, blue, yellow, white, red, green

Number of combinable units

max 6

Sound

type 1: 85dB, pulse or continuous

type 2: 100dB, pulse

type 3: 100dB, continuous

Connections

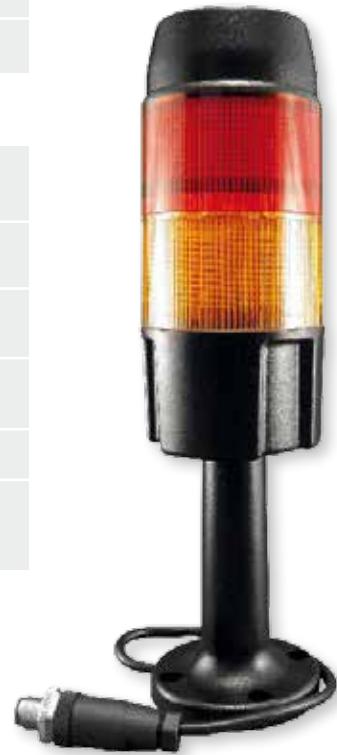

with screw cable clamp (maximum cable size 1,5 mm²)

S 220

PANEL INDICATOR LAMPS Ø 30mm

- Ultra bright LED light, steady or flashing light
- Bright light combined with elegance
- They can be wired perpendicularly and this enables to create particular compact installations
- Easy and quick mounting
- Fixed on panel up to 15 mm thickness

TECHNICAL FEATURES

Compliance

Directive 2006/95/EC Low Voltage

Directive 2004/108/EC Electromagnetic Compatibility

Directive 2011/65/EC RoHS

Directive 2006/42/EC Machinery

Conformity to standards

EN 60947-5.1 - EN 60073 - EN 60529 - EN 60068-2.6 and 27

EN 60204-1 - EN ISO 7731 - EN 981 - IEC 536

Protection degree

IP 20 (IP65 when mounted)

Lens color

orange, blue, yellow, white, red, green

Light output

ultra bright LED, last more than 25.000

Notes

S 180

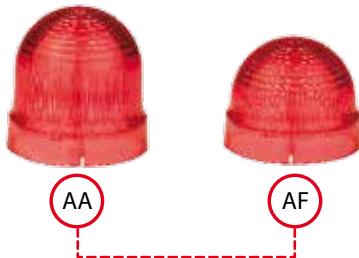

OPTICAL AND AUDIBLE MODULAR DEVICES

S180 "A CUSTOM MADE LAMP"

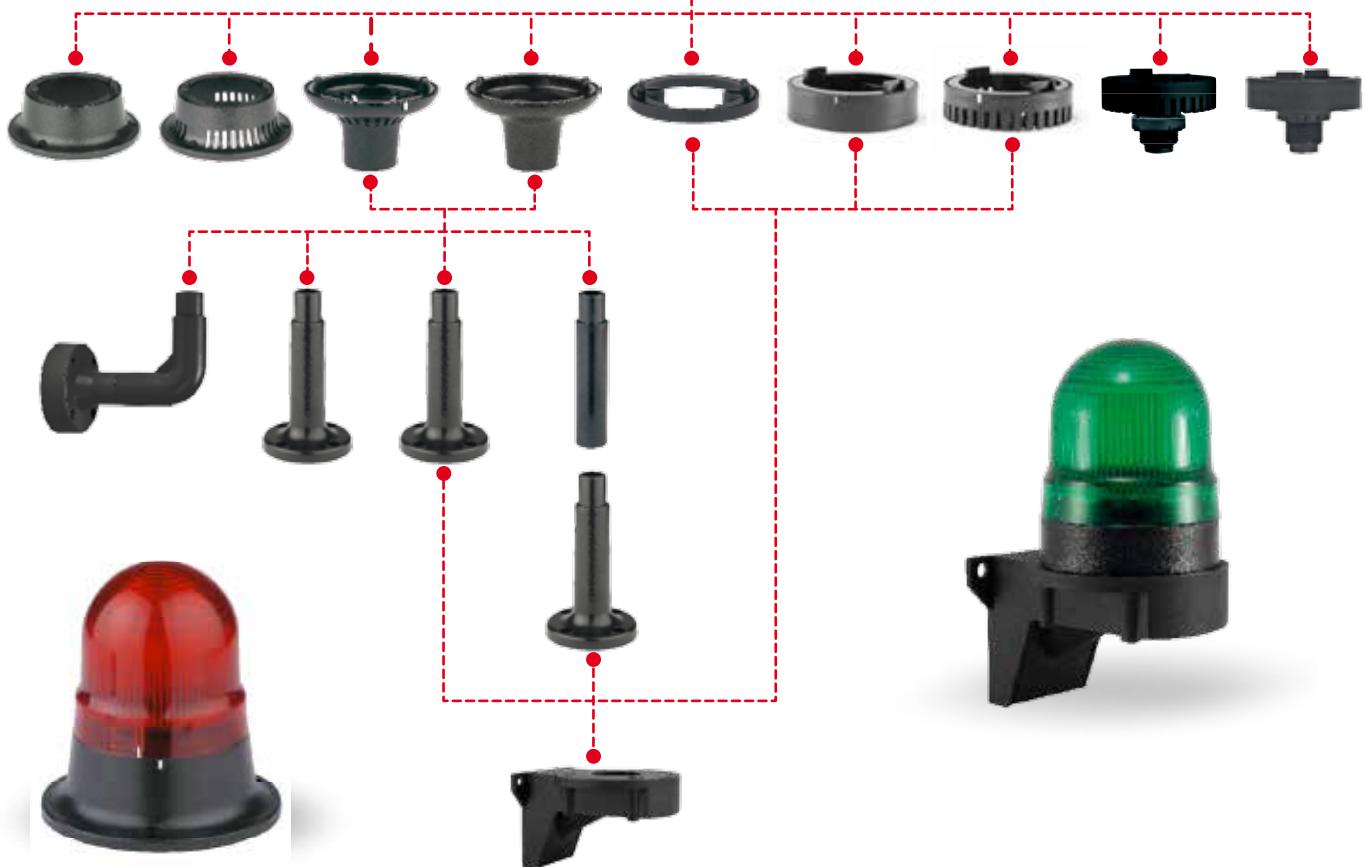

This is our idea that leads to create and engineer this modular lamp.

- Custom solutions keeping minimized costs and stock
- 10 different type of configurations for each lamp
- 8 different mounting, 4 kind of lights, 2 different domes
- A bayonet insert semplify maintenance and work
- Screw clamp terminal accessible and easy to extract

MODULAR CONFIGURATION

TECHNICAL FEATURES

Compliance
 Directive 2006/95/EC Low Voltage
 Directive 2004/108/EC Electromagnetic Compatibility
 Directive 2011/65/EC RoHS
 Directive 2006/42/EC Machinery

Conformity to standards
 EN 60947-5.1 - EN 60073 - EN 60529 - EN 60068.2.6 and 27 - EN 60204.1 -
 EN ISO 7731 - EN 981 - IEC 536

Material
 polycarbonate (PC)

Operating Voltage
 max 250 V

Protection degree
 IP 54 - clamps IP 20 (with bases 85-AS, CS, DS and ES, IP30) - According to EN 60529

Protection against electrical shock
 class II, double insulation. According to IEC 536

Operating temperature
 -20°C + 50°C

Resistance to vibrations
 2 g min. (10 - 150 Hz) according to EN 60068.2.6

Lens Color
 amber - blue - yellow - neutral - red - green according to EN 60073

Connections
 with screw cable clamps (max cable size 1,5 mm²)

STEADY OR FLASHING LED LIGHT LAMP

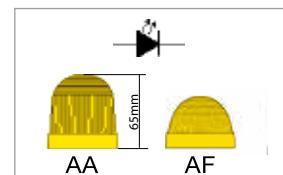

To change the function, shift the jumper inside.

Light output
 by means of ultra bright LEDs

Lasting
 > 50.000 working hours

Operating Voltage
 24 V AC/DC -40 mA

Flash frequency
 approx. 1,4 Hz (84 flashes per minute) according
 to EN 60073

ANTI-TAMPERING LOCK

- A screw block the wilful un-mount of light lamp
- Un-mount is possible only with tools
- This kind of lamp is sold assembled

TYPE	DESCRIPTION
-0Q	add this following partial code to the product when ordering

Click Clack ACCESSORY

- An easy rotation allow a quick installation without tool
- Quick lamp un-mount after assembly
- Reduce machinery obstruction (important for shipment)
- Lesser packaging and cheaper delivery costs, flawless and quick installation matched with connector version

TYPE	DESCRIPTION
80-KK	80-kk click clack accessory for easy installation and removal of stack light

BASES

85-A0
Base diam. 85 mm

85-AS
Base diam. 85 mm for acoustic

85-B0
Shallow base diam. 60 mm

85-E0
Base diam. 60 mm

85-ES
Base diam. 60 mm for acoustic

85-D0
Base for 22 mm hole mounting

85-DS
Base for acoustic, 22 mm
hole mounting

85-C0
Adapter element

85-CS
Adapter for acoustic element

54-10

PRE-ASSEMBLED JUNCTION BOXES WITH OPTICAL AND AUDIO DEVICES

- This system enable to create the most varied applications and configurations

- Arranged for mounting bases type 85-D0 and 85-D5

- The junction boxes have drills and cable glands included

TECHNICAL FEATURES

Dimensions

For one indicator: 70x70x51

For two indicators: 70x140x51

Protection degree

IP65

Pre-set

85-DO or 85-DS, cable gland (un-mounted) are included.

Material

ABS (RAL 7035)

Operating temperature

-25° + 70°C

S 185

OPTICAL SIGNAL DEVICES Ø 60mm

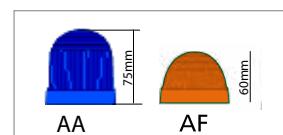

- Equipped with ultra bright LED
- Elegant line and great brightness
- Compact and easy to install
- 2 different domes in different colors
- Sold with anti-tampering block

TECHNICAL FEATURES

Compliance	Protection against electrical shock
Directive 2006/95/EC Low Voltage.	Class II, double insulation. According to IEC 536
Directive 2004/108/EC Electromagnetic Compatibility.	Resistance to vibrations
Directive 2011/65/EC RoHS	2 g min. (10 - 150 Hz) according to EN 60068.2.6
Directive 2006/42/EC Machinery.	Operating temperature
Conformity to standards	-20°C +50°C
EN 60947.5.1 - EN 60073 - EN 60529 - EN 60068.2.6 and 27	Lens Color
EN 60204.1 - EN ISO 7731 - EN 981 - IEC 536	amber - blue - yellow - neutral - red - green
Material	Connections
polycarbonate (PC)	with screw cable clamps (max cable size 1,5 mm ²)
Operating Voltage	Dimension
max 250 V	type A, 62 mm x 75 mm / type F, 62 mm x 60 mm
Protection degree	
IP 65 - According to EN 60529	

FLASHING OR STEADY LED LIGHT UNIT

Light output	
with ultra bright integrated LEDs	
Lasting	
more than 50.000 working hours	
Operating Voltage	
24 V DC/AC	
Current consumption	
24V AC/DC -40 mA	
Flash frequency	
1.4 Hz approx. (84 flashes per min.) according to EN 60073

Notes

LED BULBS

Lasting

More than 50.000 working hours.

No maintenance/service costs

More safety for machines and their operators thanks to the great reliability of the indications.

Low current consumption, simple and lasting control units.

Perfect operation even in case of strong vibrations or hits.

Note: use always LED bulbs with the same color dome.

Filament bulbs have a light emission with continuous spectrum, i.e. the kind of light which includes the whole range of visible wavelengths. In this case, it is the dome of the indicators which has the function of filtering and let only those emissions pass whose wavelength corresponds to the colour chosen.

LED bulbs use a monochromatic light source, i.e. that kind of light consisting of electromagnetic waves which all have the same wavelength (with the exception of white LEDs, usually dichromatic). Together with these bulbs, the domes lose their function of filtering and they are used only to intensify luminosity.

If you use LED bulbs with white light together with domes of other colours, it means that the domes play again their filtering function, and it results that their luminosity is diminished.

Voltage

12 - 24 - 48- 115 - 230 V (other kinds on demand)

Max current consumption

24 V DC/AC, < 50 mA - 115 V AC, < 18 mA - 230 V AC, < 17 mA

LED bulbs suitable for stack light and visual signalling:

10 LED, 9 for lateral light and 1 for frontal light
